

Drag. Drop. Done Better.

100% Drag and Drop DSP with Ethernet Control

Drag Net™ is exciting software from Rane. It offers the ultimate in signal processing flexibility, allowing you to draw any system without signal flow restrictions. Drag Net incorporates familiar Windows® file management tools and shortcuts, allowing complete project management within a single interface. Drag Net supports the RPM series, a truly functional family of processors. Got a system in mind? Drag it together yourself. Test drive Drag Net software, available free at www.rane.com/dragnet.html

Key Drag Net Software Features

- Priority Auto-Mixer/Ducker; Feedback Eliminator
- Filters: Parametric, All-Pass, High/Low-Cut and Shelving.
- Crossovers: Linkwitz-Riley, Butterworth and Bessel.
- Dynamics, Mixers, Selectors and Matrix Mixers.
- Delay, Signal Generators and Metering at any point.
- New algorithms and features downloadable via Ethernet.

Key Drag Net Hardware Features

- Line-level balanced outputs with Euroblock connections.
- Non-proprietary, 2-channel AES3 digital input & output.
- Level control and Preset recall with Logic input/output ports.
