Use any phone, tablet or laptop browser.

Web Controls are fully customizable touchscreen remotes for the HAL family. Rather than buy more fixed wall remotes, use touchscreens your client already owns. Use any web browser to connect to your HAL. There is no app to find and download.

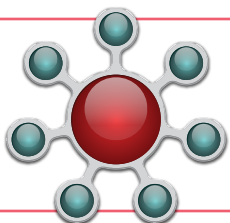

Web controls support multiple pages and any set of levels, toggles, selectors and commands. Drag, drop and resize controls as desired. Use your background images and logos. User Access logins secure pages for public or staff use.

Halogen's Control Page Designer lets you create one set of pages and use them in a web control design, DR6 display or both. It even lets you generate a QR code to provide fast browser access to the controls.

For the best look on your device, select it's template from the list built into Halogen.

Simple to use, simple to program.
